

What to Expect When You Breed to Tjalbert 460

Overall, Tjalbert really improves conformation, including feet and legs. He also improves the walk and trot, adding power, good reach and elasticity. Like their sire, Tjalbert's offspring have wonderful, kind temperaments, with great work ethic and trainability.

Offspring Characteristics

- Pretty heads
- Light head/neck connection
- Improves head/neck connection
- Long necks, adds some length
- Necks are vertical
- Sloping shoulder
- Adds a lot of length to the croup
- Horizontal croup
- Slightly shortens the back
- Good loin connection
- Uphill build
- Length to the front leg
- Good front leg conformation
- Feet a little larger than average
- Very dry/tight legs (not spongy)
- Really jet black color
- Adds a lot height
- Very powerful walk with long reach
- Trot has very good reach in stride and power, with good elasticity
- Very balanced and supple in movement
- Great temperaments and work ethic
- Kind with excellent trainability

Ideal Pairing

Tjalbert's excellent linear scores make him a good choice for a variety of mares. He will improve the walk and trot, and add height. He is suitable for producing horses for dressage and driving, as well as nice all-around sport horses.

Not Recommended for Mares With:

- Front legs that are under
- Toed-in front legs
